

Innovating For You

Welcome To Stacia Corp.

For all your mechanical drawing, analyzation and documentation needs – the one stop shop.

**Our goal is to be a facilitator of
innovative product
development, joining hands
with you to scale up your
business.**

Our Folklore.

Stacia in Greek means “resurrection” and “smart and intelligent” in old Italian. Which goes with the philosophy of the company for providing smart and intelligent solutions to resurrect business prospects. The colors in the logo suggest creative thinking coupled with trust and reliability.

Company Profile

About Us.

Ansys

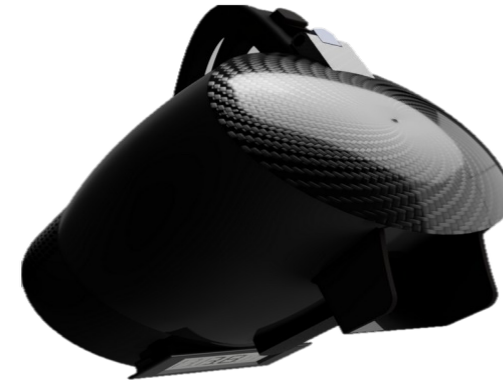

Firm's Project.

SSM, 23 Mar 2021

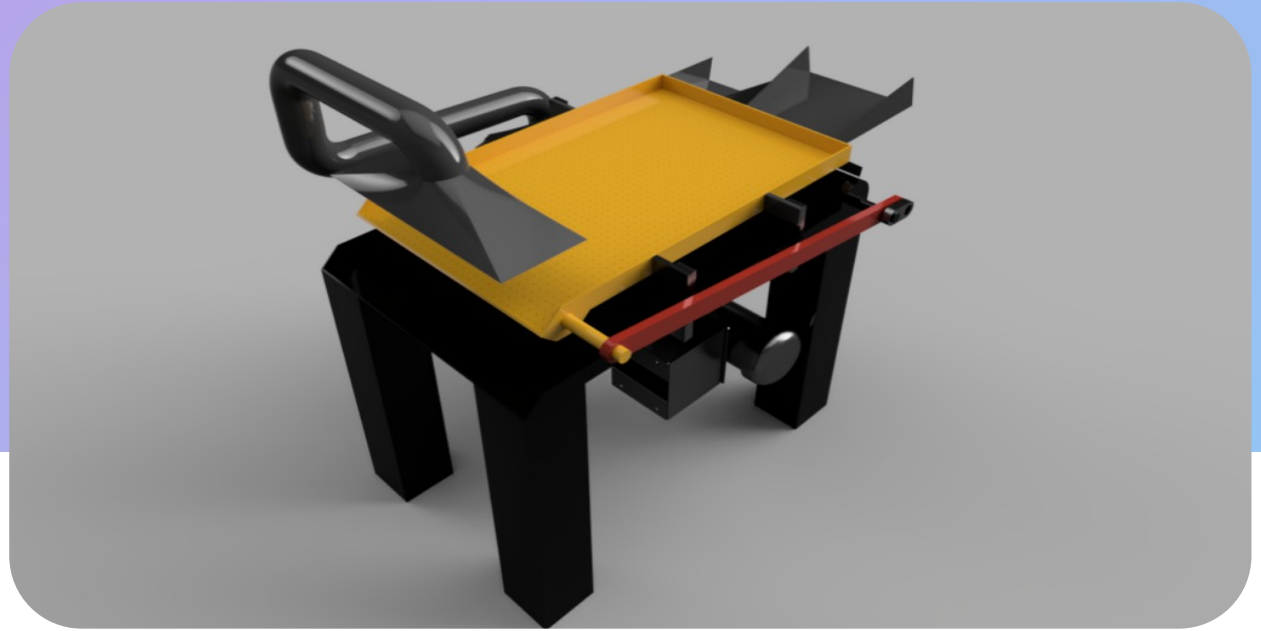

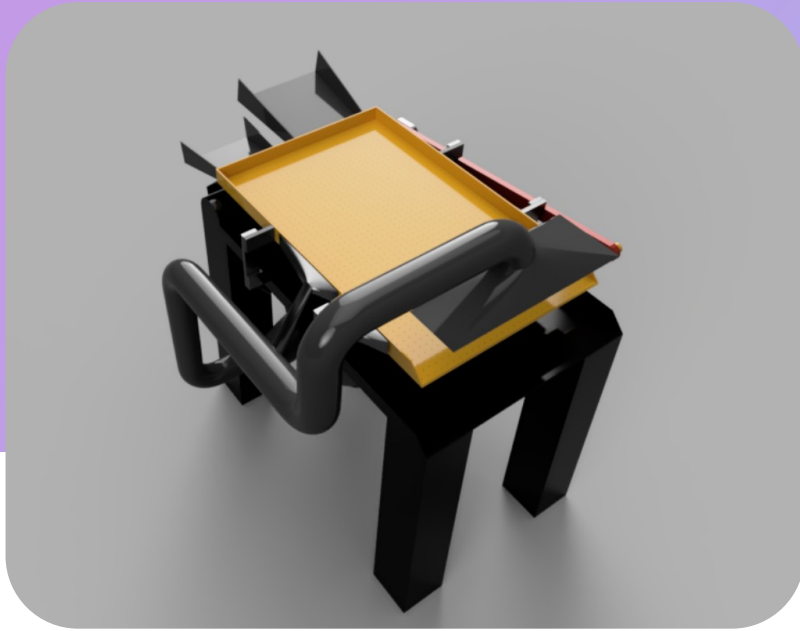

Seed sowing machine can plant different types, sizes of seeds (3mm – 5cm dia). The spacing between the seeds can also be varied. It uses line sowing & seed metering principles. As seen in Dubai Expo

Kettle, 03 JUN 2020

This is the first Indian technology which would perform both heating and cooling of water, with portable feature and DC/AC operated with precise temperature control.

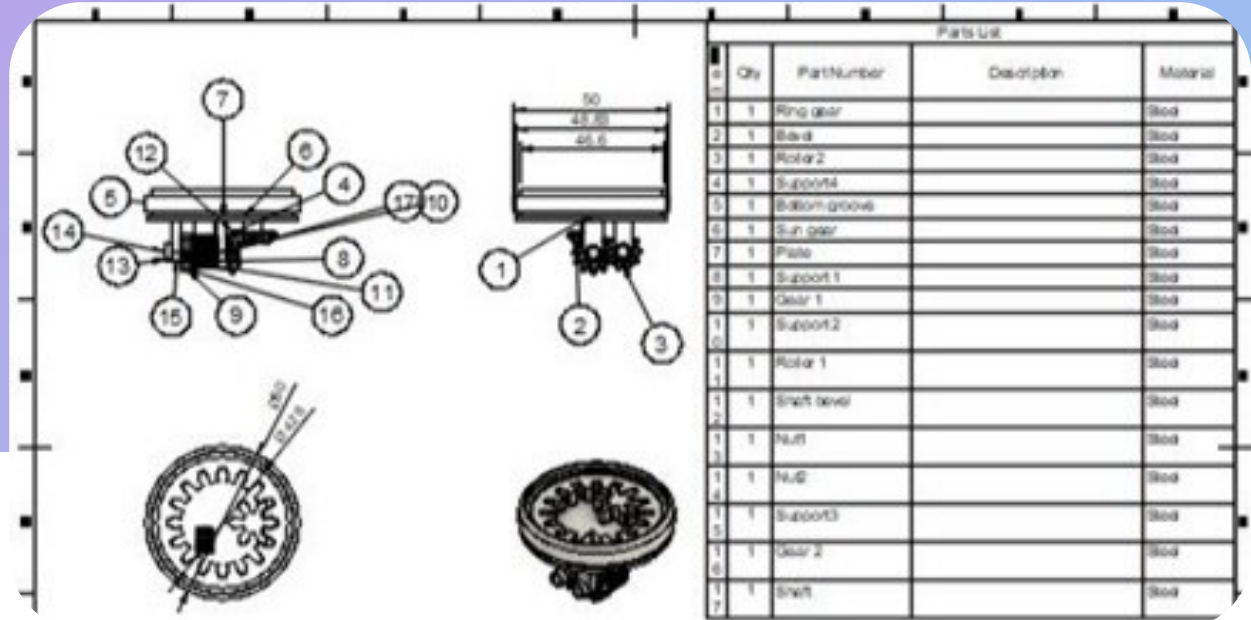

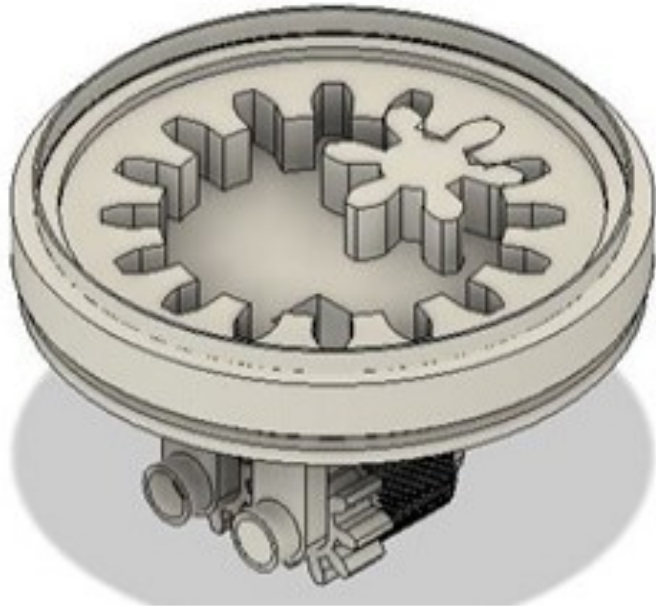

Chilli Dust Separator.

Chilli Dust Separator machine has been designed in an efficient manner to separate dust from raw materials used in FMCG industries with various levels of dust collection and separations.

Roller Crusher Mechanism

The Roller/Crusher turns and crushes raw material to a powder to different micron level when it is operated at 90-degree axis rotation (X axis rotation to Y axis)

Erection and commissioning SOP

Bill of Materials

Mechanical Design and documentation

STACIA CORP

Design and documentation for a leading STP company, including

—

- 3d Design,
- BOM formulations
- Vendor selection services
- SOP creation

Mechanical Punch and Die

Die and mould of different shapes with the capacity of 1 gram – 10gram at interval of 0.5 gram per cavity made for an asafoetida manufacturer.

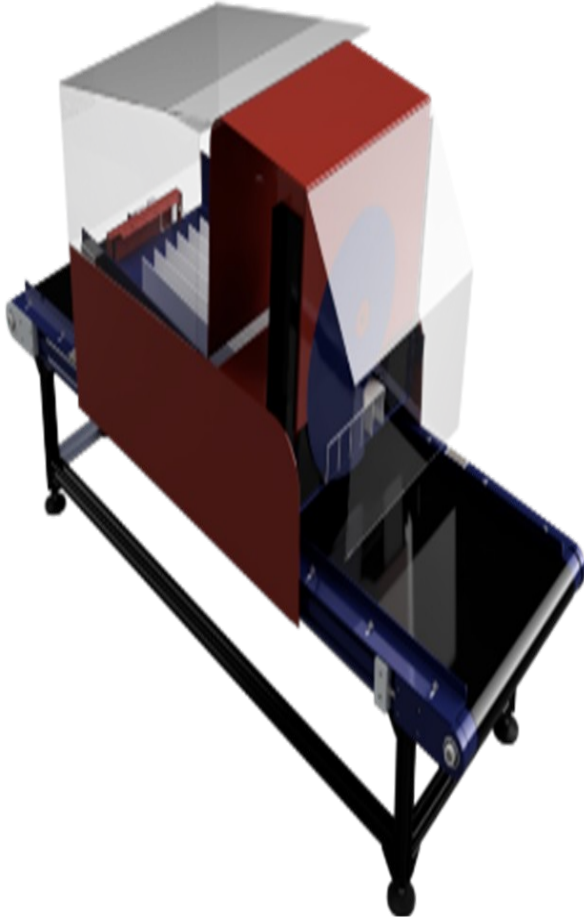

Chilli Ladling machine.

Why Chilli ladling machine

Chilli ladling machine is a special purpose machine designed to ladle (mix) the product effectively. It would be the only machine which serves the purpose competently which operates in extreme temperatures. It is design to be less in weight by selecting less weight material such as plastic cleated belt, PLCs and motors.

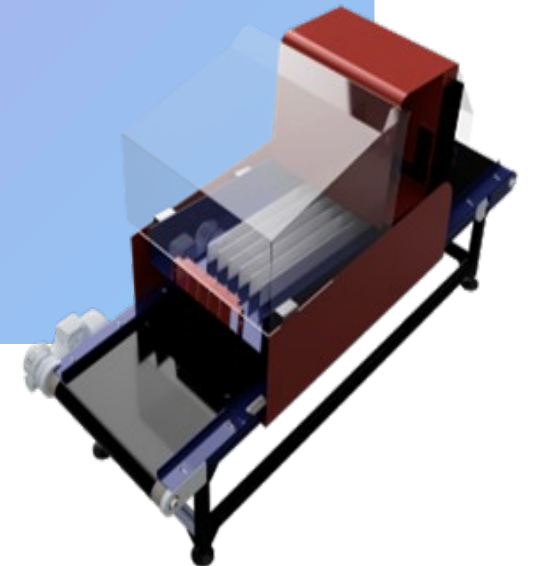

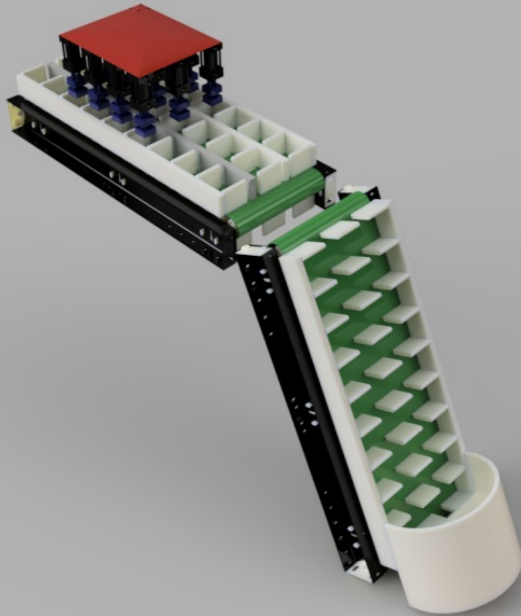

....

Our Latest Project.

PSM, 20 JUL 2021

Precision slicing machine is a coordinated machine that precisely cuts the breads into thin slices of 1.5 mm through a specially designed cutlass and arranges it in a tray that is moving at a particular speed.

On Time with High Quality.

150+

Project Done

We have done a wide variety of projects in various sectors including Agri, Food Processing & Energy.

15+

Happy Clients

In the short span of 1.5 years, we proudly have served more than 15 clients.
